

Meet Charysia

Charysia and her three daughters – Jaizelle (14), Juel (12), and Jolie (8) – are absolutely pumped to start building their Lexington Habitat home!

Charysia's current apartment doesn't offer enough space for her family and is not affordable. She looks forward to owning her home and paying an affordable mortgage. She also can't wait to be able to make her own updates to the home and put her personal touch on it.

Charysia works in patient services at a local hospital. Someday, she would love to enroll in a respiratory therapy program and complete her college degree.

When she isn't working, Charysia enjoys painting, traveling and cooking. Juel loves cheerleading, doing hair and hanging out with her friends. Jaizelle also enjoys painting,

reading and scrolling TikTok. Jolie likes going to church with the family.

When she moves into her new home, Charysia looks forward to hosting a house-warming party. She has never felt comfortable having company at her current place, so she's very excited to invite friends and loved ones into her home.

After looking for an affordable house for four years, Charysia is thrilled and thankful to join the Habitat homebuyer program. She will be the first homeowner in her family.

"I don't know a lot about what it takes to build a home, but I'm a fast learner!" she said. "Your help is deeply appreciated."

Charysia can't wait to get started on her home alongside sponsors and volunteers!

"I'm the first homeowner in my family and it means a lot."
